Experience

Financial Market Analyst & Instructor

Self-Employed | 2021 – Present

- Applied advanced market analysis (ICT, footprint, liquidity metrics) to detect anomalies and analyze performance trends.
- Built and managed an educational financial platform (37,000+ followers) delivering complex topics with clear communication.
- Ensured transparent survey and voting methodologies for community decision-making.
- Maintained and analyzed large datasets to support platform improvements and data-driven insights.

Wholesale & Distribution Manager

Self-Employed – Foodstuffs | ~2 Years

- Cleaned and analyzed sales and demand data to optimize inventory levels and supply chain performance.
- Managed contracts and client relations, improving operational workflow and partner satisfaction.
- Integrated financial analysis into pricing, purchasing, and profitability decisions.

Construction Project Manager

Self-Employed – Building & Public Works | ~6 Years

- Led multiple construction projects, managing timelines, budgets, resources, and deliverables.
- Created detailed project schedules and coordinated workforce and materials.
- Controlled costs through quantitative budgeting and continuous performance tracking.

PROFESSIONAL SUMMARY

Detail-oriented Junior Data Analyst with hands-on experience in data cleaning, visualization, statistical analysis, and business reporting. Certified in Google Data Analytics with strong analytical, financial, and project-management background. Skilled in transforming raw data into meaningful insights to support data-driven decisions. Seeking a challenging data role to apply technical skills, deliver impactful analyses, and contribute to organizational growth.

Projects

MINT Classics Warehouse Report – Excel, SQL, Data Cleaning, DaDashboard Development shboarding

Portfolio : haouzdatahub.github.io

- Analyzed warehouse inventory data to assess stock levels, category performance, and product movement.
- Cleaned and transformed raw data using Excel and SQL to eliminate inconsistencies and ensure data quality.
- Built an analytical dashboard highlighting KPIs such as stock turnover, inventory aging, and product performance.
- Delivered data-driven recommendations to improve operational efficiency and inventory decisions.

Cyclistic Bike-Share Analysis Case Study – R, Excel, Visualization Case Study:

haouzdatahub.github.io/Cyclistic_bik_presentation_analysis_case_study.html

- Analyzed Cyclistic's bike-share dataset to compare behavioral trends between casual riders and annual members.
- Identified key insights related to peak usage hours, seasonal trends, ride durations, and rider segmentation.
- Created clear visualizations and dashboards to communicate findings to business stakeholders.
- Developed strategic recommendations to support membership growth and improve customer engagement.
